Backend & data — Node.js, NestJS, tRPC, GraphQL, Prisma ORM, Supabase, PostgreSQL, MySQL, Laravel, C# .NET, NextAuth.js
CMS — DatoCMS, WordPress, Sanity, headless CMS
Other — SAP, component-based development

Personal

Eager to learn | Self-taught | Time management | Motivated

Experience

Oct 2025 – present
Own company

Yointly

Collaboration platform connecting brands with content creators: brands create brand deals, creators apply and get reviewed.

- Built the entire application with Next.js 16 (App Router), React 19 and TypeScript, with separate workspaces for creators and organisations.
- Designed the data model in Supabase/PostgreSQL with 68 migrations, RPC functions and Row Level Security.
- Implemented a multi-step brand deal builder (rich text with Tiptap, compensation models, deadlines) and an application flow with statuses: pending, shortlisted, accepted, rejected, withdrawn.
- Built email OTP authentication, profiles with uploads to Supabase Storage, and a creator portfolio. Forms are validated with Zod and React Hook Form.

Next.js 16 | React 19 | TypeScript | Supabase | PostgreSQL | Tiptap | Zod | React Hook Form

Oct 2024 – Jan 2025

Internship – Craftzing Group

Recrudootje Referral Reward Tool

- Developed an internal tool that rewards successful referrals with personal surprises, such as spa days or dinners.
- Integrated DatoCMS via GraphQL for dynamic content management and implemented authentication with NextAuth.js.

Next.js | TypeScript | Sass | DatoCMS | GraphQL | NextAuth.js

Mar – Jul 2024

Spotworkshops

Platform partnering with 500+ entrepreneurs to offer unique workshops. Redesigned and optimised key pages and components to improve the UI/UX.

- Built reusable components and migrated the codebase from the Vue Options API to the Composition API for better maintainability and performance.
- Integrated Inertia.js to optimise data handling and reduce API calls (Vue 3, Inertia.js).

Projects

Graduation project

NextPlay

Full-stack web application that lets basketball coaches and players manage their season in one place.

- Training and game schedules, attendance, live box scores and season statistics with charts and PDF reports.
- Player management via invite links and a playbook with game plans and play diagrams.
- Separate Next.js front-end and NestJS GraphQL back-end, with role-based authorisation and automated tests in CI.

TypeScript | Next.js | React | Tailwind CSS | TanStack Query | GraphQL | NestJS | Fastify | Prisma | PostgreSQL | NextAuth | Zod

Education

2021 – 2025

Professional Bachelor's degree

Karel de Grote University of Applied Sciences – Multimedia and Creative Technologies

Languages

Dutch | English | French | Portuguese
